

# 1 in 4 People with ALS Have a PEG Tube<sup>1</sup>

**TIGLUTIK<sup>®</sup> (riluzole) is the only formulation of riluzole indicated for both oral and PEG tube administration**

- Indicated throughout all stages of ALS<sup>2</sup>
- Administered twice daily and is bioequivalent to Rilutek<sup>®</sup> (riluzole) tablets<sup>2-4</sup>
- No product manipulation or premixing required

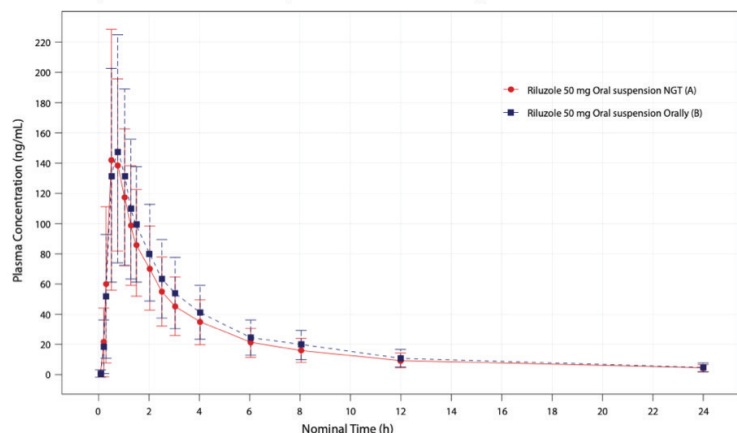

**TIGLUTIK was Formulated For Use with PEG Tubes**

- Designed for easy administration with silicone or polyurethane tubing
- Eliminates crushing tablets - a common cause of clogged PEG tubes<sup>5</sup>
- Aligns with recommendations that patients with enteral feeding tubes should use liquid formulations of medication whenever possible<sup>5</sup>

## Intragastric and Oral Administration of TIGLUTIK are Bioequivalent

TIGLUTIK pharmacokinetic comparison between intragastric and oral administration

### Indication

TIGLUTIK<sup>®</sup> (riluzole) is indicated for the treatment of patients with amyotrophic lateral sclerosis (ALS).

### Important Safety Information

#### Contraindication

TIGLUTIK is contraindicated in patients with a history of severe hypersensitivity reactions to riluzole or to any of its components.

Please see Important Safety Information throughout and accompanying Full Prescribing Information

## Indication

TIGLUTIK<sup>®</sup> (riluzole) is indicated for the treatment of patients with amyotrophic lateral sclerosis (ALS).

## Important Safety Information

### Contraindication

TIGLUTIK is contraindicated in patients with a history of severe hypersensitivity reactions to riluzole or to any of its components.

### Warnings and Precautions

TIGLUTIK can cause liver injury and there have been cases of drug-induced liver injury, some of which were fatal, in patients taking riluzole. Asymptomatic elevations of hepatic transaminases have been reported and, in some patients, have recurred upon re-challenge with riluzole. Maximum increases in ALT occurred within 3 months after starting riluzole. Monitor patients for hepatic injury every month for the first 3 months of treatment, and periodically thereafter; TIGLUTIK should be discontinued if there is evidence of liver dysfunction, for example, elevated bilirubin. Use of TIGLUTIK with other hepatotoxic drugs may increase the risk for hepatotoxicity.

TIGLUTIK can cause neutropenia. Cases of severe neutropenia (absolute neutrophil count less than 500 per mm<sup>3</sup>) within the first 2 months of riluzole treatment have been reported. Advise patients to report febrile illnesses.

TIGLUTIK can cause interstitial lung disease, including hypersensitivity pneumonitis. Discontinue TIGLUTIK immediately if interstitial lung disease develops.

### Adverse Reactions

The most common adverse reactions (incidence greater than or equal to 5% and greater than placebo) of TIGLUTIK were oral hypoesthesia (29%), asthenia (19%), nausea (16%), decreased lung function (10%), hypertension (5%), and abdominal pain (5%).

Coadministration of TIGLUTIK with strong or moderate CYP1A2 inhibitors, such as ciprofloxacin, enoxacin, fluvoxamine, methoxsalen, mexiletine, oral contraceptives, thiabendazole, vemurafenib, and zileuton, may increase the risk of TIGLUTIK-associated adverse reactions.

Coadministration of TIGLUTIK with CYP1A2 inducers may result in decreased efficacy of TIGLUTIK.

### Use in Specific Populations

Patients with mild or moderate hepatic impairment (Child-Pugh's score A or B) had increases in AUC compared to patients with normal hepatic function. Thus, patients with mild or moderate hepatic impairment may be at increased risk of adverse reactions. Use of TIGLUTIK is not recommended in patients with baseline elevations of serum aminotransferases greater than 5 times the upper limit of normal or evidence of liver dysfunction.

Japanese patients are more likely to have higher riluzole concentrations, and thus may be at a greater risk of adverse reactions.

## How to Order TIGLUTIK

To help make the TIGLUTIK<sup>®</sup> (riluzole) prescribing process as easy as possible, TIGLUTIK is only available through Anovo Specialty Pharmacy.

### Prescribing TIGLUTIK

Prescribing TIGLUTIK is designed to be easy and can be done via:

Phone: (844) 763-1198

Fax: (855) 813-2039

E-scribe—Follow these 3 steps:

1. Search for Anovo in your EHR system
2. Select [AnovoRxPharmacy#5](#)
3. Remember the Anovo NABP/NCPDP Provider ID: [4445640](#)

- When ordering TIGLUTIK in an Electronic Health Record (EHR), and the TIGLUTIK name does not appear, simply contact Anovo at [\(844\) 763-1198](#) and they will help you complete the intake forms
- Anovo will engage with the patient's insurance company to help alleviate the burden on the prescriber's office. There may be situations where Anovo will have to follow up with the prescriber's office to request missing information
- Once all the paperwork is completed, Anovo will call the patient or his/her designee to confirm shipment of TIGLUTIK

# Helping Patients Get Their Medication

## Features of TIGLUTIK® (riluzole) support

- ITF Pharma is dedicated to working with prescribers so ordering TIGLUTIK is as easy as possible
- Patients eligible for copay support **pay no more than \$50** per filled prescription of TIGLUTIK\*
- Ask your Specialty Account Manager about the ITF Pharma *Bridge Program* for patients with Medicare Part D insurance

\*See Eligibility and Restrictions below.

## Benefits of Anovo Specialty Pharmacy

- **Administrative support:** Anovo provides ongoing assistance to healthcare professionals and patients with expert handling of the necessary paperwork and insurance requirements
- **Direct-to-patient convenience:** TIGLUTIK is shipped from Anovo directly to your patient
- **Ongoing assistance:** Anovo will help alleviate the burden on the patients to remember their refills of TIGLUTIK and manage insurance and challenges with reimbursement
- **Comprehensive communication:** Knowledgeable and highly trained staff are available to answer any TIGLUTIK treatment-related questions
- **No questions left unanswered:** If you have any questions, you are encouraged to call Anovo at **(844) 763-1198** – they are there to help

## Eligibility and Restrictions

Offer is valid for each prescription fill for commercially insured patients where TIGLUTIK is covered. Offer is valid for patients aged 18 and older. Medicare, Medicaid, TRICARE, or other patients of other federal or state programs are not eligible. ITF Pharma reserves the right to rescind, revoke, or amend this offer without notice. Offer good only in the USA, including Puerto Rico, at participating retail pharmacies. Void if prohibited by law, taxed, or restricted. This offer has no cash value and may not be used in combination with any other discount, coupon, rebate, free trial, or similar offer for the specified product. Maximum savings limit applies; patient out-of-pocket expense may vary.

## Prescription Order Form

Fax to (855) 813-2039

Please call Anovo at (844) 763-1198 if you need assistance ordering TIGLUTIK
